Integration Without Boundaries

nanoputian

About Us

We bring your **data and systems** together making your business **simply better**

At nanoputian (nano), we redefine integration solutions for diverse platforms, including ERP, workforce, and CRM systems. Born from the frustrations our founders experienced with existing integrations tools, together with the emerging serverless technology, nanoputian was established in 2016 in Brisbane, Australia, as a beacon of innovation and efficiency in the technology landscape.

Innovation Through Experience

Our journey began with a clear vision to alleviate the complexities of traditional integrations. As an early adopter of serverless applications and event-driven architectures, we have successfully combined our extensive multi-domain knowledge to challenge the status quo.

Experience the Power of Serverless

Unlock the full potential of your business with our cutting edge solutions, seamlessly integrated, effortlessly scalable, and designed for the future.

Secure and Local

Leverage a complete cloud-native, event-driven AWS environment. Our uniquely secure solution is always ready when you are.

Ultimate Flexibility

Automate processes seamlessly across all business systems, regardless of location, platform, or technology.

Zero Maintenance

Eliminate manual updates and infrastructure management, so you can focus on what matters most.

Powerful Microservices

Build modular, high-performance applications that scale effortlessly to meet business demands.

Explore Our Solutions

nanoHR

Automate and secure HR and payroll for seamless compliance and scalability.

nanoconnect

Our platform connects data across systems for fast deployment and scalability.

nanoDATA

Protect critical data with NanoData, ensuring seamless migrations and scalable archiving.
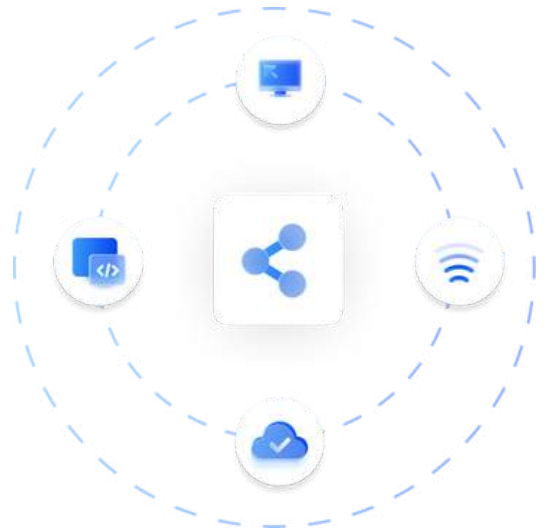

nanoconnect

Simplify Your Integration Landscape

DISCOVER nanoconnect

Your premier Integration Platform as a Service (iPaaS) solution, designed to simplify complex business environments.

KEY FEATURES

Integration Without Boundaries

Rapid Deployment	High Security	Unlimited Scalability	Flexible Integrations
Get up and running quickly with solutions that are ready to deploy & easy to manage.	Whether scaling up operations or expanding into new markets, our platform accommodates growth without boundaries.	We prioritise your data's security with advanced encryption & maintain high availability to support your business continuity.	With AI, your manual process are automated and decisions are data-driven.

AI Connectivity	Single Platform Management	Smart Business Decisions
Utilise AI to streamline connectivity & automate processes, increasing efficiency & reducing errors.	Control all your integrations through one intuitive platform, enhancing your operational efficiency & visibility.	AI technologies transform complex data sets into actionable insights, enabling smarter decisions that propel your business forward.

WHY nanoconnect

Experience the flexibility with NanoConnect, where any location, any combination of cloud providers, and any database are not just supported—they're optimised. Our platform's ability to integrate seamlessly across all business systems means you're prepared for both today's needs and tomorrow's challenges.
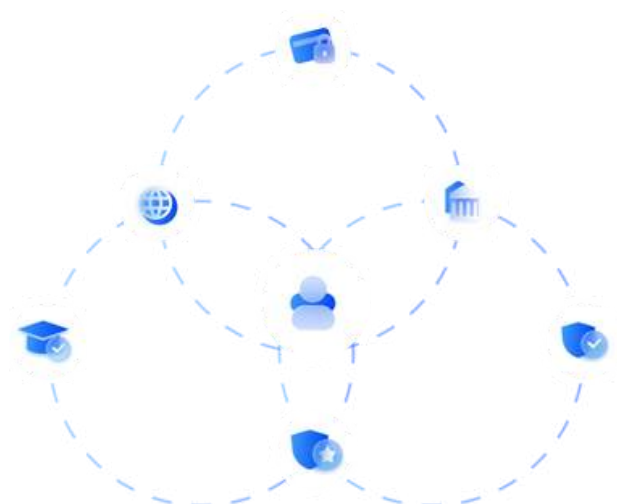

nanoHR

Connect Your Human Resource & Payroll Management

DISCOVER NANOHR

NanoHR introduces a suite of powerful tools designed to streamline HR & payroll processes across your organisation.

PAYCONNECT: THE CORE OF NANOHR

Connect HR & Payroll Effortlessly

PayConnect represents the pinnacle of integration between HR and payroll systems. Catering to businesses of all sizes, it is scalable from 20 to 200,000 employees, ensuring efficiency and security across all operational scales. With PayConnect, experience swift deployment and eliminate the need for expensive and complex software customisations.

NanoHR Add-ons

VisaConnect

Perfect for organisations employing international staff, VisaConnect liaises directly with government bodies to verify work entitlements in any country.

SafeConnect

Ensures all new employees possess the required safety certifications, maintaining up-to-date compliance with occupational health and safety standards.

PEPConnect

Integrates your HR systems with databases of Politically Exposed Persons (PEPs) to screen for sanctions and perform continuous due diligence.

PoliceConnect

Facilitates seamless connections to police databases for essential employee background checks, integral to the hiring process.

EducationConnect

Automates the verification of educational qualifications directly from institutions, ensuring that credentials of potential employees are legitimate and accredited.

LicenseConnect

Keeps your business compliant by continuously verifying the licensing status of employees, critical for roles requiring specific operational licenses.

WHY NANOHR

Choose NanoHR for a seamless, secure, and scalable solution to manage your human resources and payroll systems. Our suite of integration tools ensures that your business operations meet compliance standards while enhancing efficiency and security.

nanodata

Seamless Data Management Across Platforms

DISCOVER NANODATA

NanoData offers a comprehensive portfolio of solutions designed to simplify data migration, storage, and security for your organisation.

nanoMIGRATE

Streamlined Data Migration

NanoMigrate is designed to help organisations migrate data between systems, whether upgrading to newer versions or transitioning to entirely new platforms. This solution supports data movement across on-premises, virtual private cloud, or public cloud environments, ensuring your vital data is extracted, cleaned, corrected, and loaded without complications.

nanoSAFE

Streamlined Data Reservation

In the event of system failures, **NanoSafe** provides a robust and scalable live data archive to support business continuity. This solution eliminates the need for replicating costly business systems, offering a more efficient way to secure your critical data against catastrophic events.

nanoETERNAL

Streamlined Data Retention

NanoEternal allows your organisation to retire outdated legacy systems without losing access to the essential historical data they contain. Store and access all your old system data in context, for as long as required, ensuring you never lose the informational wealth accumulated over years of operation.

WHY NANODATA

Choose NanoData for state-of-the-art solutions that streamline complex data management tasks. Our portfolio is designed to handle every aspect of your data journey—from migration to long-term preservation—ensuring integrity, accessibility, and compliance.

nanoputian

Simply Integrated

Dive into a world where technology simplifies, rather than complicates; where security, scalability, and intelligence come standard.
